

Puzzle 1

X-Wing. Look for a digit with two possible positions in each of two rows, lining up in the same two columns. Remove that digit elsewhere in those columns. Rows and columns can swap roles.

6				2		7		
					5			8
			8		6		4	
4	6		3				2	
5	1						9	7
	8				4		6	3
	3		6		2			
2			7					
		5		8				6

Solution: page 66

Puzzle 2

Naked Triple. Three cells in one unit share just three candidates between them. Those digits belong in those cells, so remove them from the other cells in that unit.

			6			9		
		3		4	7		2	
6		7						3
		1		5	9	8		
		9	8	2		6		
4						7		1
	5		7	3		4		
		8			1
