

Puzzle 1

X-Wing. Look for a digit with two possible positions in each of two rows, lining up in the same two columns. Remove that digit elsewhere in those columns. Rows and columns can swap roles.

	C1	C2	C3	C4	C5	C6	C7	C8	C9
R1	6				2		7		
R2						5			8
R3				8		6		4	
R4	4	6		3				2	
R5	5	1						9	7
R6		8				4		6	3
R7		3		6		2			
R8	2			7					
R9			5		8				6

☐ Completed

Solution: page 66

Puzzle 2

Naked Triple. Three cells in one unit share just three candidates between them. Those digits belong in those cells, so remove them from the other cells in that unit.

	C1	C2	C3	C4	C5	C6	C7	C8	C9
R1				6			9		
R2			3		4	7		2	
R3	6		7						3
R4			1		5	9	8		
R5									
R6			9	8	2		6		
R7	4						7		1
R8		5		7	3		4		
R9			8			1
